

Emergency/Rescue Series

Compact, all solid-state electronic controlled hydraulic generators

Smart Power Systems® severe-duty, electronic controlled generator systems are designed to meet the most demanding mobile applications, and provide 120VAC/240VAC, 60Hz clean power. The cleanest power available in hydraulic generators.

Their (1) reliability, (2) compact 1 piece module, and (3) proven field performance make Smart Power the *first choice* for fire fighters.

Smart Power Systems® provides

Instant power you can rely on

- Trouble free GENSET operation and maintenance
- Rugged, stainless steel, fully enclosed one piece module
- Smart Start* power engagement reduces stress on genset and truck powertrain

Compact size

- GENSET module includes integrated hydraulic fluid reservoir
- Drop-in field replacement (replaces most GENSET brands)
- Smallest industry footprint saves valuable space for other gear/equipment
- Common hookups for 6.2, 8 and 10kW models
- Mount in dunnage area, compartment, or hose bed storage
- Low Profile—Ideal for use on aerial apparatus

High performance

- Unique “super cooled” power generation for continuous 120 °F operation
- Solid state system controller provides total control
- Command & Control Center continuously monitors system and optimizes overall performance
- Meets/exceeds NFPA 1900 requirements

Ease of operation

- Smart Touch® sealed touch pads provide operator interactive capabilities; manual override/control
- Integrated diagnostics and service advisories
- Service intervals of 250 hours or 3 years

Superior warranty protection

- 6 years/2000 hours—including PTO pump and Command and Control Center
- The total generator system is factory tested and Certified prior to shipment

Outstanding technical support

- Large experienced technical support staff
- Over 45 years of manufacturing expertise
- 165,000 square ft. state-of-the-art facility is ISO9001/2008 certified
