

440 Series Buzz-Lite™

Audio-visual warning system delivering instant alerts through light and sound

The 440 Series Buzz-Lite™ is a compact audio visual warning device engineered to deliver immediate operator awareness in critical situations. Combining a high-intensity light with a powerful buzzer, this vehicle warning buzzer light combo ensures faults, safety conditions, and system failures are seen and heard instantly.

Designed for demanding environments, Buzz-Lite™ serves as a reliable operator alert system industrial solution across vehicles, equipment, and machinery where missed warnings can lead to damage, downtime, or unsafe operation.

Key Features & Performance

- Integrated visual and audible alarm module – light and buzzer in one compact unit
- High-intensity indicator paired with a high decibel buzzer 90dB output
- Durable, vibration resistant warning device built for harsh environments
- Compact panel mount warning indicator design for easy integration

Polarity insensitive for simplified installation Long-life, maintenance-free operation

Applications & Use Cases

Buzz-Lite™ is built for versatility across industries, functioning as a dependable fleet vehicle warning system, agricultural equipment alarm system, or marine warning buzzer light. It is ideal wherever a real time operator alert device is needed to drive immediate response.

- Trucks, buses, and commercial fleet vehicles
- Industrial machinery and construction equipment
- Marine and agricultural systems
- Safety alerts such as low oil, overheat, brake faults, PTO engagement, and operator warnings

This is where buyers recognize the value immediately – a simple, highly effective equipment safety warning indicator that works every time.

Technical Overview

The Buzz-Lite™ operates as a dual-alert dashboard warning alternative system, activating both light and sound simultaneously when triggered by a sensor or system input. This ensures warnings are unmistakable and never overlooked.

- Voltage: 12V (24V available)
- Output: ~90 dB audible alarm
- Mounting: rugged panel mount alarm (fits up to 1/2" thick panels)
- Terminals: standard .250 blade
- Size: approx. 1.75" x 0.9" x 1.45"
- Lens: polycarbonate
- Non-Polarized

Example Product: 440B Buzz-Lite™ (12V)

Compact audio-visual alert system for 12V applications

The 440B is a dependable 12V warning buzzer with light designed for systems where immediate operator recognition is critical. Its compact footprint and integrated design make it ideal for tight installations in fleet and industrial environments.

Buzz-Lite™ Still Delivering

Simple, effective, and proven over decades, Buzz-Lite™ remains a go-to industrial buzzer with light solution. It eliminates complexity while delivering instant alerts, making it a trusted safety alert buzzer for trucks and equipment across multiple industries.
