

FEATURING:

- Solid state circuitry
- Long life; protected against transients (300 volts PIV)
- High sound level output: (90db)
- Operates from standard sender switches
- BARK can be used with or without warning lights
- Heavy duty magnetic relaxation oscillator sound source
- 0.1 amps RMS current at 12 volts
- High impact resistance
- Up to 6 sender inputs
- Locking blade terminals & polarized connector
- 12 or 24 volt system

Standard flasher connector.

Alternating Bus flasher.

BARK employs solid state circuitry to isolate the individual senders. A heavy duty magnetic relaxation oscillator is the sound source. BARK is designed for rugged use, and high sound level output of 90 db.

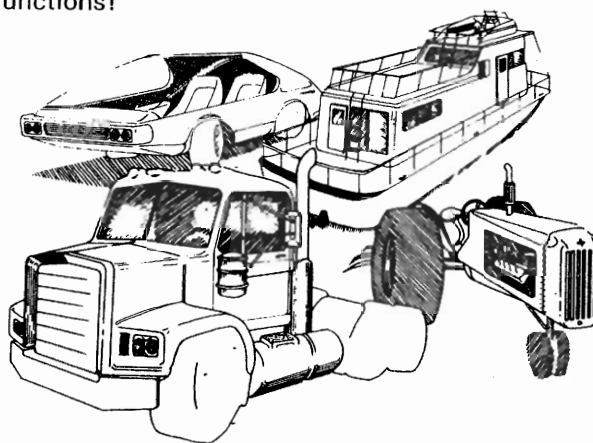

* BARK

PROTECTS VALUABLE EQUIPMENT

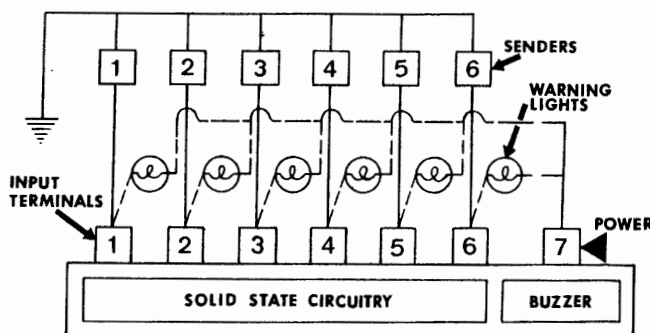

BARK is a high performance, highly reliable system to warn of malfunctions or of dangerous conditions in your vehicle. It is used to warn of . . .

With BARK'S unique solid state compactness it can be mounted anywhere in the vehicle. BARK is standard OE with truck, tractor and boat builders. So let a single buzzer handle all your warning functions!

AUDIO PLUS VISUAL WARNING SYSTEM

440 Series Buzz-Lite™

An audio-visual warning device which incorporates an electronic light and heavy-duty oscillator buzzer. It can be used as an alarm for low air pressure, low oil, and other malfunctions by emitting both light and sound.

Features include:

- Long life - high reliability
- Compact rugged design
- High intensity cold cathode diode light
- Mounts into panels up to 1/2" thick

443 Series Bark Alarm

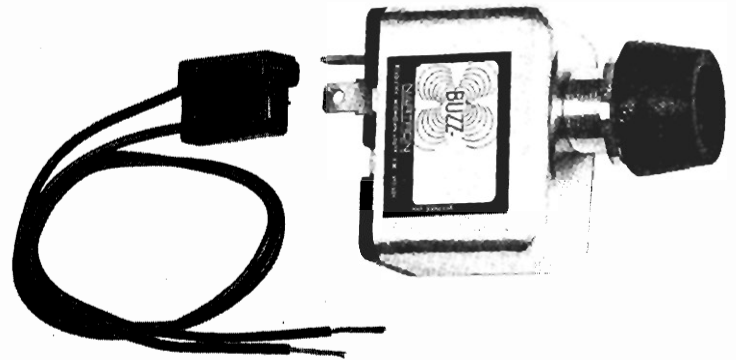

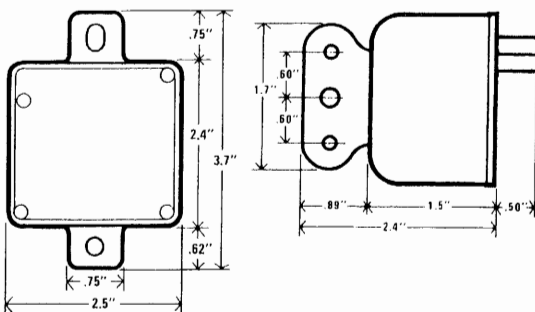

This heavy duty buzzer is highly reliable and capable of monitoring many functions, i.e., low air, low water, high temperature and door ajar. It has solid state circuitry which gives the unit long life by protecting against transients up to 300 volts.

Features include:

- High sound level output - 90 db.
- Heavy duty magnetic relaxation oscillator sound source
- Operates from standard sender switches
- Can be used with or without warning lights
- Requires only 0.1 amps RMS current at 12 volts
- Can accommodate up to 6 sender inputs
- 24 volts optional

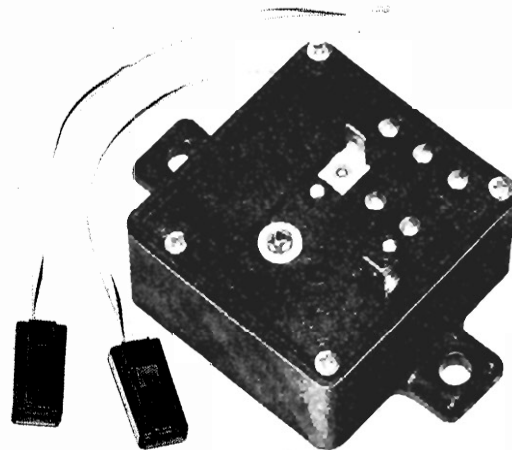

PLASTIC CASE

METAL CASE

440 Buzz-Lite, 12 Volt

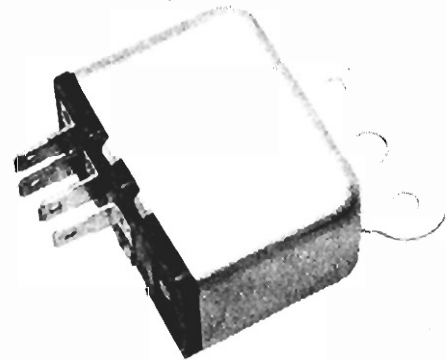

440 Wiring Kit

443-1 Bark Alarm — Plastic Case/one input

443-3 Bark Alarm — Plastic Case/three input

443-6 Bark Alarm — Plastic Case/six input

443B-1 Bark Alarm — Metal Case/one input

443B-3 Bark Alarm — Metal Case/three input
