

Light Rescue LRT Series Generator

LRT Series 6.2, 8, 10, 15 kW for Ford 250, 350, 450, 550 & 650 chassis

Smart Power Systems® severe-duty, electronic controlled generator systems are designed to meet the most demanding mobile applications, and provide 120VAC/240VAC, 60Hz clean power. The cleanest power available in hydraulic generators.

Their (1) reliability, (2) compact 1 piece module, and (3) proven field performance make Smart Power the first choice for emergency responders.

Smart Power Systems® provides...

Instant power you can rely on

- Trouble free GENSET operation and maintenance
- Generator 100% system tested with pump prior to shipment
- Mounts on light duty trucks; compartment, top, etc.
- Fits 4X2 and 4X4 configurations with 10R140 or the F650 6R140 TorqShift automatic transmission
- Rugged, fully enclosed Compact Top Mount tray assembly
- Unique “super cooled” power generation for continuous 120° F operation
- Solid state system controller provides total control
- Smart Start* power engagement reduces stress on PTO and truck powertrain

Compact size

- Drop-in field replacement
- Vertical exhaust up through standard walking grate surface (LRT)
- Flexible design allows cooler and reservoir to be remote mounted if required
- Smallest industry footprint with integrated reservoir saves valuable space for additional equipment

Ease of operation

- Command & Control Center continuously monitors system and optimizes overall performance
- Smart Touch® sealed touch pads provide operator interactive capabilities; manual override/control.
- Integrated diagnostics and service advisories
- Service intervals of 250 hours or 3 years

Superior warranty protection

- 6 years/2000 hours includes hydraulic pump and Command and Control Center
- The total generator system is factory tested and Certified

Outstanding technical support

- Large experienced technical support staff
- Over 45 years manufacturing expertise
- 165,000 square ft. state-of-the-art facility is ISO9001/2015 certified
